Ceramage from Shofu® is a light-cured zirconium silicate micro ceramic able to produce indirect restorations that are said to exhibit virtually the same light transmission as natural teeth and have remarkable translucency. According to the manufacturer, this material's microfine structure gives it a very high compressive and tensile strength, excellent color stability and wear as well as versatility. Ceramage offers a complete set of gum colors and new bleach shades for demanding aesthetic requirements. This material can be used as a stand-alone indirect restorative material, applied to any type of alloy or as a metal-free veneering material and is indicated for inlays, onlays, crowns and bridges, and implants. The Ceramage AB Set comes with opaque pre-opaque, opaque liner, flowable F-T glass, opaque dentin, body, cervical enhancer, translucent incisal T, and incisal effect modifiers. The Ceramage CD Set comes with opaque, opaque dentin, body, and cervical enhancer.

Item	Order Number	Suggested Retail Price	Government Price
Ceramage AB Set	1801	\$2,440.00	\$1,216.94
Ceramage CD Set	1802	\$850.00	\$423.93

Kerr Corporation recently introduced the **Ultra-Waxer 2**, a dual spatula electronic waxer. According to the manufacturer this unit has easy to use functions such as programmable presets and quick heating. The spatula features a light weight aluminum body with color coded foam grips for easy identification and an ability to change tips while still hot. Included with the Ultra-Waxer 2 (dual voltage) unit are 2 Ultra-Spatula Cord/Handles, Small PKT, Large PKT, 110 volt electrical cord and 220 volt electrical cord. The Ultra-Waxer 2 can be purchased for \$498.95 (suggested retail) and \$299.00 (government). Other various styles of waxing tips are available for \$75.95 (suggested retail) and \$45.11 (government).
